About Analyser

The Analyser is a working product that visualizes model input and output data, such as socioeconomic and demographics (land use), trip OD and highway network attributes. It was developed for internal data QA/QC and sharing interactive maps to clients. The Analyser has two main functions.

First, the Analyser provides at-a-glance views of model input data in maps, tables and charts similar to other visualization tools. These features aim to provide modelers and planners with a better means to navigate model input and output data, ultimately assisting their planning activities e.g., Long-Range Transportation Plan (LRTP) and Transportation Improvement Programs (TIP).

The Analyser can compare model inputs and outputs from different scenarios, which otherwise would require additional post-processing using a combination of transportation demand model software, GIS and data management / processing programs such as Excel, SQL, python, R, etc.

The Analyser also provides an export button for interactive (html) maps, tables and charts for use in presentations, reports or public meetings.

The second main function of the Analyser is to review and edit scenario input files, including highway network attributes. It provides features to export .csv/.xlsx files and allows users to edit network attributes online and/or download spreadsheet file from the Analyser.

This working product can be tailored to users' needs. It only requires some basic setup efforts for the new regions.

Choose Scenario Year

2019

This SED Data Visualizer presents socioeconomic and demographic (land use) data in interactive map and table. Users can view zonal level data by hovering the mouse

Users can visualize other SED variables by selecting them on the right side of the map. Users can also change map backgrounds and color schemes, and export maps with defined settings for future use e.g., documentation, data sharing, public meetings, etc.

Click on the zone(s) of interest on the map. The table below shows the backend SED (input) table for the selected zone(s).

Users can delete the zones from the search box or deselect the zone(s) by clicking the "Show Original SED Table" button. The table below will then displays the original (input) table for all zones.

Choose Scenario Year

2019

year

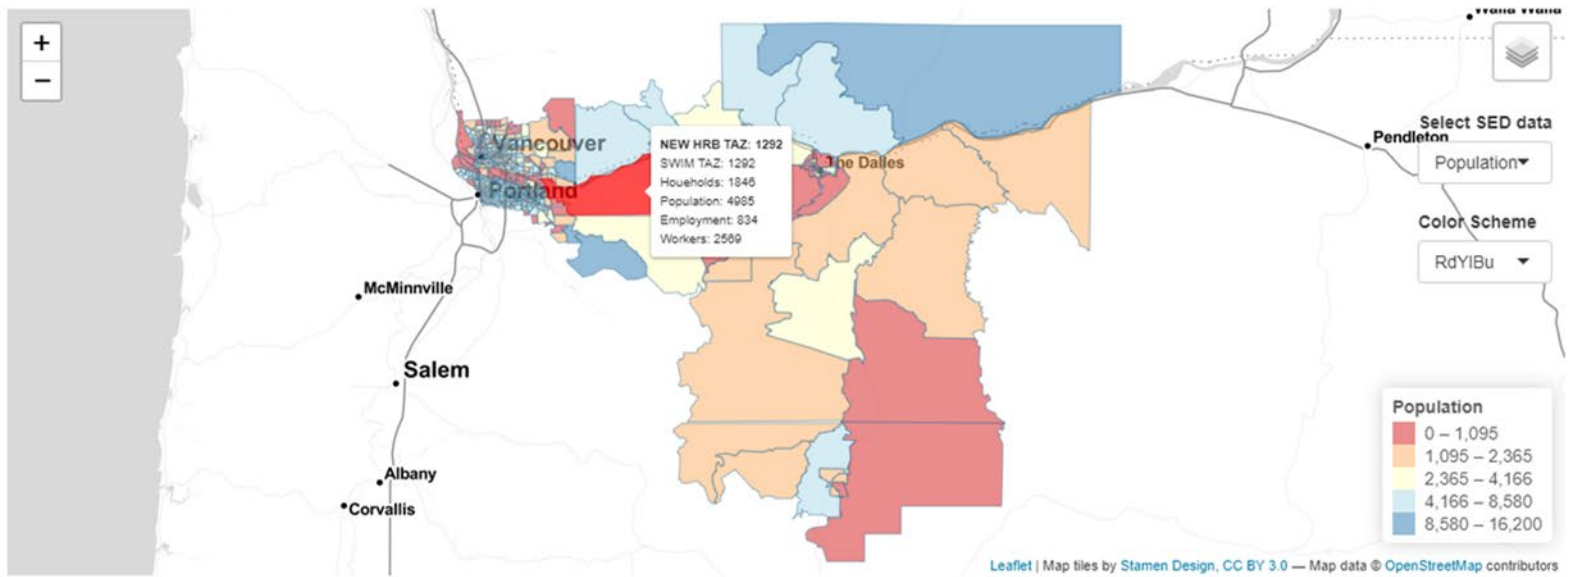

2019

2031

2040

Click on the zone(s) of interest on the map. The table below shows the backend SED (input) table for the selected zone(s).

Users can delete the zones from the search box or deselect the zone(s) by clicking the "Show Original SED Table" button. The table below will then displays the original (input) table for all zones.

The screenshot shows the 'Model In/Output Analyzer' web application. The interface includes a navigation menu with 'Intro', 'SED', 'Network', and 'TripOD'. A 'Choose Scenario Year' dropdown is set to '2019'. A text box explains the tool's functionality, including instructions to click on zones of interest and to use the 'Show Original SED Table' button. The map displays various zones, with a legend for 'Workers' showing five categories: 0-513 (purple), 513-1,128 (light purple), 1,128-1,998 (medium purple), 1,998-3,970 (green), and 3,970-8,513 (dark green). A 'Selected TAZs' box contains the values 2824, 2823, 2822, and 2829. Below this is a table with columns for NO, ACT, BZONE, COUNTY, NO_HRB, Note, EMP, TotalHHs, TotalPersons, TotalWorkers, EMPadj, TotalHHsadj, and TotalPersonsadj. The table displays data for the selected zones.

The screenshot shows a web browser window with two tabs for 'Model In/Output Analyzer'. The address bar shows 'about:blank'. The main content area displays a report titled 'Model In/Output Analyzer' with a timestamp of '5/7/23, 8:29 AM'. The report contains a table with the following data:

NO	ACT	BZONE	COUNTY	NO_HRB	Note	EMP	TotalHrs	TotalPersons	TotalWorkers	EMPsadj	TotalHrsadj	TotalPersonsadj	TotalWorkersadj
2822	6	2822	Wasco	2822		38	124	390	147	38	124	390	147
2823	6	2823	Wasco	2823		622	1058	2524	1132	622	1058	2524	1132
2824	6	2824	Wasco	2824		42	374	1262	510	42	374	1262	510
2829	7	2829	Jefferson	2829		74	274	849	325	74	274	849	325

Below the table, there is a print dialog box with the following settings:

- Print: 1 page
- Destination: Save as PDF
- Pages: All
- Layout: Portrait
- More settings: (dropdown arrow)
- Buttons: Save, Cancel

On the right side of the browser window, a partial table is visible with the following data:

nsadj	TotalWorkersadj
	147
	1132
	510
	325
